Community First Health Centers

Improving the quality of life for our community.

Dental Services

Here to put your family's oral health & hygiene **FIRST!**

At Community First Health Centers, we care about our patients' dental and oral health. We provide a wide range of family dental services, including: preventive care, such as teeth cleanings and fluoride treatments; emergency dental services, including extractions and X-rays; restorative treatments; oral health education; and referrals.

Our highly qualified dental providers are available to provide dental care to your whole family! We welcome most commercial insurances, Medicaid and Medicare Health Plans, and have a sliding fee program available for those who qualify!

At Community First Health Centers, we provide dental care services for children and adults. Routine dental care helps remove plaque, which can become the main source of a number of conditions that include infections, periodontal disease, and overall tooth decay.

Our preventive dental services are designed to examine and clean places that can be hard to reach on your own. Our team also provides more advanced dental care when needed and is committed to providing quality education for managing oral hygiene at home. We keep your costs and risks as low as possible, but are prepared to provide you the care you need in the event of an emergency.

Finding a reliable dentist is just one step to achieving optimal oral health. When you combine good oral hygiene with eating right and routine visits with your dentist, your teeth can stay in tip-top condition.

Let us help take care of your smile!
